## *==Air Heater*

POWER ..... 2000W  
FOR ROOMS UP TO ..... (M<sup>2</sup>) 25  
EAN ..... 0637913040757

**H35** represents the new generation of heating; it is the unique device that combines PTC and Carbon Fiber simultaneously, offering a better thermal performance without forgetting its meticulous design.

**H35** represents the new generation of heating; it is the only device that combines PTC and Carbon Fiber simultaneously, offering a better thermal performance without forgetting its meticulous design.

**H35** has a precise thermal sense, so it will be able to heat in a smart way the space in which it is and will obtain a uniform temperature, saving more energy than other systems due to its continuous heat storage .

**H35** is portable, so you can profit of it in any situation, and it has four heat power .

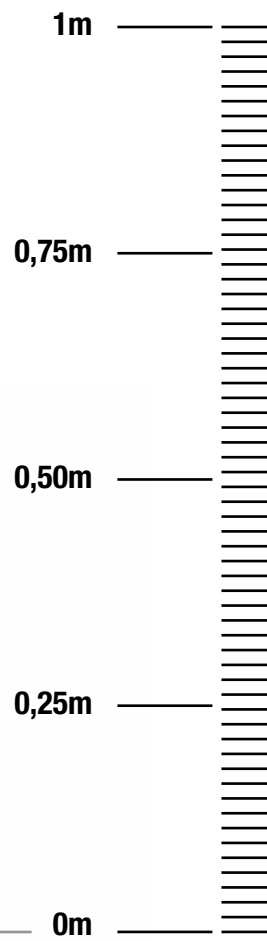

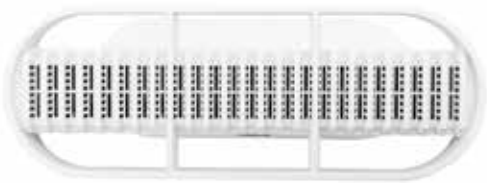

Protection also comes as standard, because if it is overheating or overturned, it will be stopped automatically.

Easy use throughout its LED display, and of course, through its remote control for your maximum comfort.
